

SPEAKER OF THE HOUSE

MIKE JOHNSON

A Brighter Economic Future

The Biden-Harris economic agenda has produced four years of painful inflation, wage decline, and reckless government spending.

House Republicans have a plan to usher in a brighter economic future for every American family.

Promote Investment and Opportunity

- Extend the Trump tax cuts and let Americans keep more of their money
- Encourage investments in ground-breaking R&D and job creation
- Support a robust child tax credit and the dignity of work

Prioritize The Nation

- Promote American manufacturers and American economic leadership
- Disentangle our vital economic interests from Communist China
- Use the tax code to deter illegal immigration and eliminate loopholes that reward illegal aliens

Reform Education

- Maximize school choice for parents and families
- Hold woke and elite universities accountable for out-of-control costs

Reinvigorate The Energy Sector

- Return America to a place of global energy independence
- Repeal wasteful Green New Deal tax credits and anti-energy regulations

Spend Responsibly

- Create a leaner, faster, and well-organized federal workforce
- Restore fiscal sanity and reduce wasteful federal spending
- Root out waste, fraud, abuse and \$764 billion of improper payments under Biden-Harris
